2022 Communicable Disease & PrEP Summit

Monday, December 12, 2022

This year, the Communicable Disease Summit and the Delaware HIV Consortium's PrEP Summit will be held concurrently, in a virtual environment.

Morning Sessions (Communicable Disease)

- DPH Update on Delaware Communicable Disease
- Monkeypox Update
- Disasters of Human Health - Communicable Disease
- Adult Immunizations

Afternoon Sessions (HIV/AIDS and PrEP)

- HIV/AIDS Panel
- HIV Epidemiologic Profile
- PrEParing Primary Care
- New in the World of PrEP

National Influenza Vaccination Week

December 5-9, 2022

National Influenza Vaccination Week (NIVW) is an annual observance in December to remind everyone 6 months and older that there's still time to get vaccinated against flu. Vaccination is particularly important for people who are at higher risk of developing serious flu complications, including young children. Millions of children get sick with flu every year, and thousands will be hospitalized as a result.

Updates

ACIP Meeting ([ACIP](#))

- None listed.

COCA Call ([COCA](#))

- Thursday, December 8, 2022. Updates on MIS-C: Epidemiology, Case Definition, and Prevention

Vaccines and Related Biological Products Advisory Committee ([VRBPAC](#))

- None listed.

MMWR Weekly ([No 48](#))

- HIV services and outcomes during the COVID-19 pandemic
- SARS-CoV-2 serology and self-reported infection among adults
- Effectiveness of bivalent mRNA vaccines in preventing symptomatic SARS-CoV-2 infection
- Paxlovid associated with decreased hospital rate among adults with COVID-19

Food & Drug Administration

2022-2023 Flu Season

Week 47

- Clinical Lab positivity: 25.1%
- Public Health Lab: Most frequently reported viruses: A(H3N2)
- Outpatient respiratory illness: 7.5%

Burden Estimates

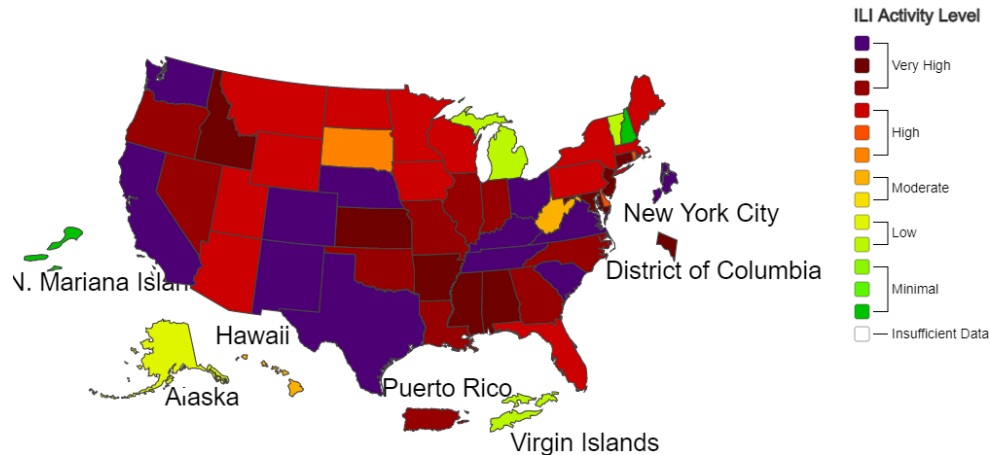

- Illnesses: 8.7 M - 19 M
- Medical Visits: 4.2 M - 9.5 M
- Hospitalizations: 78,000 - 170,000
- Deaths: 4,500 - 13,000

A Weekly Influenza Surveillance Report Prepared by the Influenza Division

Outpatient Respiratory Illness Activity Map Determined by Data Reported to ILINet

This system monitors visits for respiratory illness that includes fever plus a cough or sore throat, also referred to as ILI, not laboratory confirmed influenza and may capture patient visits due to other respiratory pathogens that cause similar symptoms.

2022-23 Influenza Season Week 47 ending Nov 26, 2022

*This map uses the proportion of outpatient visits to healthcare providers for influenza-like illness to measure the ILI activity level within a state. It does not, however, measure the extent of geographic spread of flu within a state. Therefore, outbreaks occurring in a single city could cause the state to display high activity levels.

*Data collected in ILINet may disproportionately represent certain populations within a state, and therefore may not accurately depict the full picture of influenza activity for the whole state.

*Data displayed in this map are based on data collected in ILINet, whereas the State and Territorial flu activity map are based on reports from state and territorial epidemiologists. The data presented in this map is preliminary and may change as more data is received.

*Differences in the data presented by CDC and state health departments likely represent differing levels of data completeness with data presented by the state likely being the more complete.

*For the data download you can use Activity Level for the number and Activity Level Label for the text description.

*This graphic notice means that you are leaving an HHS Web site.

For more information, please see CDC's Exit Notification and Disclaimer policy.

For more information on the methodology, please visit Outpatient Illness Surveillance methods section.

Delaware Flu Cases

- Year to Date: 2,944
 - New Castle: 1,477
 - Kent: 195 (14.0%)
 - Sussex: 0
- This Week: 863
 - New Castle: 432
 - Kent: 103
 - Sussex: n/a
- ILI Rate: 2.8%
- Hospitalizations: n/a
- Deaths: 0
- Vaccines Administered: 255,267 (26.4%)
