

Week In Review

January 15, 2024

Updates

ACIP Meeting ([ACIP](#))

- February 28-29, 2024

COCA Call ([COCA](#))

- None listed.

Vaccines and Related Biological Products Advisory Committee ([VRBPAC](#))

- None listed.

MMWR Weekly ([No 1](#))

- ACIP Recommended Immunization Schedules - Children, Adolescents, and Adults - now available
- Effectiveness of bivalent mRNA COVID-19 vaccines in preventing COVID-19 related thromboembolic events among medicare enrollees aged 65+ years and those with end stage renal disease

Food & Drug Administration ([Announcements](#))

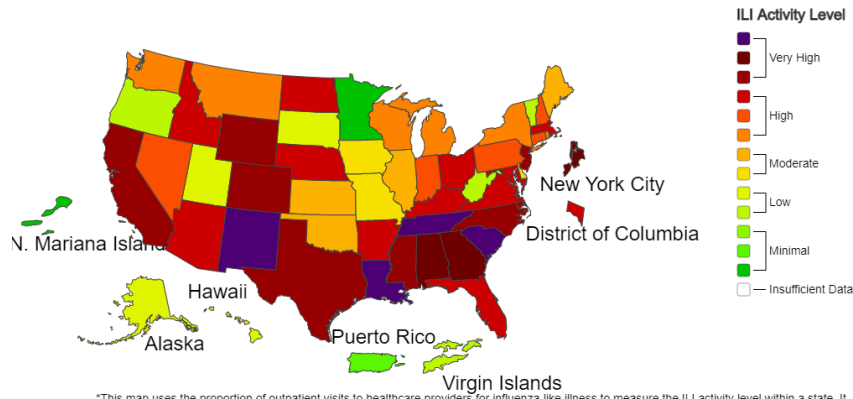

- None

2023-2024 Respiratory Disease

Outpatient Respiratory Illness Activity Map Determined by Data Reported to ILINet

This system monitors visits for respiratory illness that includes fever plus a cough or sore throat, also referred to as ILI, not laboratory confirmed influenza and may capture patient visits due to other respiratory pathogens that cause similar symptoms.

2023-24 Influenza Season Week 1 ending Jan 06, 2024

*This map uses the proportion of outpatient visits to healthcare providers for influenza-like illness to measure the ILI activity level within a state. It does not, however, measure the extent of geographic spread of flu within a state. Therefore, outbreaks occurring in a single city could cause the state to display high activity levels.
 *Data collected in ILINet may disproportionately represent certain populations within a state, and therefore may not accurately depict the full picture of influenza activity for the whole state.
 *Data displayed in this map are based on data collected in ILINet, whereas the State and Territorial flu activity map are based on reports from state and territorial epidemiologists. The data presented in this map is preliminary and may change as more data is received.
 *Differences in the data presented by CDC and state health departments likely represent differing levels of data completeness with data presented by the state likely being the more complete.

Influenza

Week 1 (ending January 6)

- 14.0% positivity
- Most frequent virus: A(H1N1)pdm09
- Outpatient Respiratory Illness: 5.7%

Preliminary In-Season Estimates

- Illnesses: 14-26 M
- Medical Visits: 6.2-12 M
- Hospitalizations: 150,000-320,000
- Deaths: 9,400-28,000

Delaware ILI Activity Level: Moderate

- Hospitalizations: 72 (YTD)
- Percentage Vaccinated: 29.0%

Location	Week 52	Year to Date
Delaware	691	2,186
New Castle	336	1,061
Kent	152	551
Sussex	203	547

COVID-19

As of January 11, 2024

- Positive cases this week: 1066
- Current hospitalizations: 144.9
- Current critical hospitalizations: 13.4
- Total vaccinated with updated 2023-2024 dose: 15.5%

Cases By County

- New Castle: 502
- Kent: 229
- Sussex: 318
