

Week In Review

March 13, 2023

Updates

ACIP Meeting ([ACIP](#))

- None.

COCA Call ([COCA](#))

- None.

Vaccines and Related Biological Products Advisory Committee ([VRBPAC](#))

- None.

MMWR Weekly ([No 10](#))

- Public health response to clusters of rapid HIV transmission among Hispanic or Latino gay, bisexual, and other men who have sex with men

Food & Drug Administration

- Notice addressing [COVID-19](#) guidance documents
- Marketing authorization of first [COVID-19 antigen](#) test

2022-2023 Flu Season

Week 9 (week ending March 4)

- Clinical Lab positivity: 0.9%
- Public Health Lab: Most frequently reported viruses: A(H3N2)
- Outpatient respiratory illness: 2.4%

Burden Estimates

- Illnesses: 26 M - 50 M
- Medical Visits: 12 M - 24 M
- Hospitalizations: 290,000 - 620,000
- Deaths: 18,000 - 55,000

Seasonal influenza activity remains low nationally.

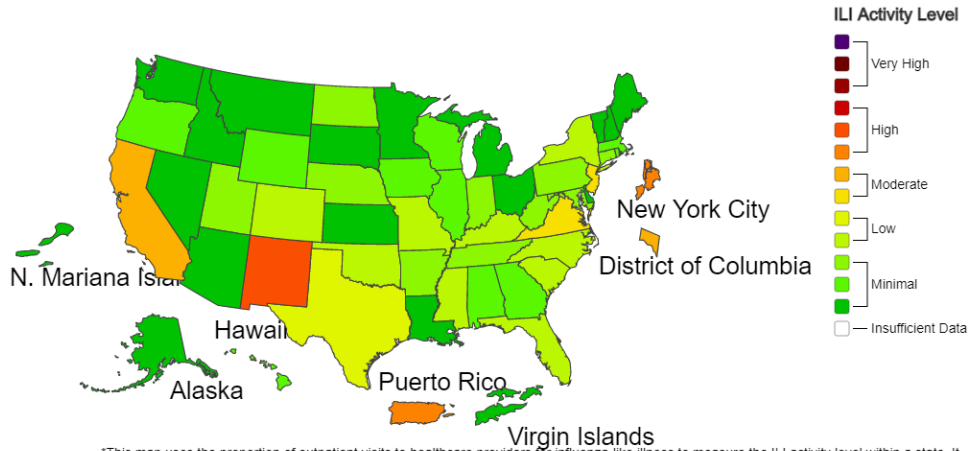

A Weekly Influenza Surveillance Report Prepared by the Influenza Division

Outpatient Respiratory Illness Activity Map Determined by Data Reported to ILINet

This system monitors visits for respiratory illness that includes fever plus a cough or sore throat, also referred to as ILI, not laboratory confirmed influenza and may capture patient visits due to other respiratory pathogens that cause similar symptoms.

2022-23 Influenza Season Week 9 ending Mar 04, 2023

*This map uses the proportion of outpatient visits to healthcare providers for influenza-like illness to measure the ILI activity level within a state. It does not, however, measure the extent of geographic spread of flu within a state. Therefore, outbreaks occurring in a single city could cause the state to display high activity levels.

*Data collected in ILINet may disproportionately represent certain populations within a state, and therefore may not accurately depict the full picture of influenza activity for the whole state.

*Data displayed in this map are based on data collected in ILINet, whereas the State and Territorial flu activity map are based on reports from state and territorial epidemiologists. The data presented in this map is preliminary and may change as more data is received.

*Differences in the data presented by CDC and state health departments likely represent differing levels of data completeness with data presented by the state likely being the more complete.

*For the data download you can use Activity Level for the number and Activity Level Label for the text description.

*This graphic notice means that you are leaving an HHS Web site.

For more information, please see CDC's Exit Notification and Disclaimer policy.

For more information on the methodology, please visit Outpatient Illness Surveillance methods section.

Delaware Flu Cases

- Year to Date: 9,007
- New Castle: 4,138
- Kent: 2,247
- Sussex: 2,624

- This Week: 12
- ILI Rate: 1.3%

- Total Hospitalizations: 70
- Deaths: 1
- Vaccines Administered: 329,435 (34.0%)

Updates

-

Coronavirus Updates

Delaware ([MyHealthyCommunity](#))

Total - 332,158

Deaths - 3,324 (26.1 per 10,000 people)

- New Castle - 188,038
- Kent - 64,592
- Sussex - 78,488
- Hospitalizations - 81
- Critical - 5

- Tests Positive: 7.3%
- Vaccines
 - Fully Vaccinated - 645,641 (66.7%)
 - Partially Vaccinated - 95,710
 - Bivalent - 185,878

Updates

- US House unanimously backs COVID [origins](#) information declassification
- US to lift COVID-19 [testing](#) requirements for travelers from China
- WHO: Finding COVID-19's [origins](#) is a moral imperative
