2022 Communicable Disease & PrEP Summit

Monday, December 12, 2022

This year, the Communicable Disease Summit and the Delaware HIV Consortium's PrEP Summit will be held concurrently, in a virtual environment.

Morning Sessions (Communicable Disease)

- DPH Update on Delaware Communicable Disease
- Monkeypox Update
- Disasters of Human Health - Communicable Disease
- Adult Immunizations

Afternoon Sessions (HIV/AIDS and PrEP)

- HIV/AIDS Panel
- HIV Epidemiologic Profile
- PrEParing Primary Care
- New in the World of PrEP

Updates

ACIP Meeting ([ACIP](#))

- None listed.

COCA Call ([COCA](#))

- None listed.

Vaccines and Related Biological Products Advisory Committee ([VRBPAC](#))

- None listed.

MMWR Weekly (No 46)

- MMR Vaccine (Priorix): Recommendations of ACIP
- Perception of local COVID-19 transmission and use of preventive behaviors among adults with recent SARS-CoV-2 infection
- Sociodemographic variation in early uptake of COVID-19 vaccine and parental intent and attitudes toward vaccination of children aged 6 mo - 4 yrs

Food & Drug Administration

2022-2023 Flu Season

Week 45.

- Clinical Lab positivity: 14.7%
- Public Health Lab: Most frequently reported viruses: A(H3N2)
- Outpatient respiratory illness: 5.8%

Burden Estimates

- Illnesses: 4.4 M - 9.8 M
- Medical Visits: 2.1 M - 4.8 M
- Hospitalizations: 38,000 - 77,000
- Deaths: 2,100 - 6,200

A Weekly Influenza Surveillance Report Prepared by the Influenza Division

Outpatient Respiratory Illness Activity Map Determined by Data Reported to ILINet

This system monitors visits for respiratory illness that includes fever plus a cough or sore throat, also referred to as ILI, not laboratory confirmed influenza and may capture patient visits due to other respiratory pathogens that cause similar symptoms.

2022-23 Influenza Season Week 45 ending Nov 12, 2022

*This map uses the proportion of outpatient visits to healthcare providers for influenza-like illness to measure the ILI activity level within a state. It does not, however, measure the extent of geographic spread of flu within a state. Therefore, outbreaks occurring in a single city could cause the state to display high activity levels.

*Data collected in ILINet may disproportionately represent certain populations within a state, and therefore may not accurately depict the full picture of influenza activity for the whole state.

*Data displayed in this map are based on data collected in ILINet, whereas the State and Territorial flu activity map are based on reports from state and territorial epidemiologists. The data presented in this map is preliminary and may change as more data is received.

*Differences in the data presented by CDC and state health departments likely represent differing levels of data completeness with data presented by the state likely being the more complete.

*For the data download you can use Activity Level for the number and Activity Level Label for the text description.

*This graphic notice means that you are leaving an HHS Web site.

For more information, please see CDC's Exit Notification and Disclaimer policy.

For more information on the methodology, please visit Outpatient Illness Surveillance methods section.

Delaware Flu Cases

- Year to Date: 1,404

- New Castle: 684 (49.0%)
- Kent: 195 (14.0%)
- Sussex: 0
- This Week: 598
 - New Castle: 309
 - Kent: 103
 - Sussex: n/a
- ILI Rate: 1.89%
- Hospitalizations: 14
- Deaths: 0
- Vaccines Administered: 253,124 (26.2%)
