Updates

ACIP Meeting ([ACIP](#))

- October 19th & 20th. Updates and votes on various vaccines.

COCA Call ([COCA](#))

- Thursday, October 27. Update on Monkeypox in Children, Adolescents, and People who are Pregnant or Breastfeeding

Vaccines and Related Biological Products Advisory Committee ([VRBPAC](#))

- None listed.

MMWR Weekly ([No 42](#))

- Progress toward poliomyelitis eradication
- Influenza and COVID-19 vaccination coverage among healthcare personnel
- Effectiveness of monovalent mRNA vaccines against COVID-19 associated hospitalization among immunocompetent adults during BA.1/BA.2 and BA.4/BA.5 predominant periods of SARS-CoV-2 omicron variant in the US
- Effectiveness of COVID-19 mRNA vaccines against COVID-19-associated hospitalizations among immunocompromised adults during SARS-CoV-2 omicron predominance
- Ocular monkeypox

Food & Drug Administration

2022-2023 Flu Season

Week 41.

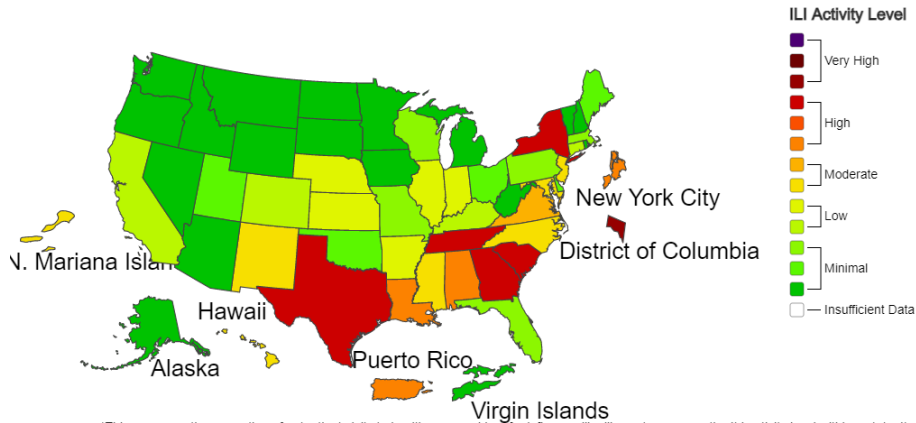

- Clinical Lab positivity: 4.4%
- Public Health Lab: Most frequently reported viruses: A(H3N2)
- Outpatient respiratory illness: 3.0%

A Weekly Influenza Surveillance Report Prepared by the Influenza Division

Outpatient Respiratory Illness Activity Map Determined by Data Reported to ILINet

This system monitors visits for respiratory illness that includes fever plus a cough or sore throat, also referred to as ILI, not laboratory confirmed influenza and may capture patient visits due to other respiratory pathogens that cause similar symptoms.

2022-23 Influenza Season Week 41 ending Oct 15, 2022

*This map uses the proportion of outpatient visits to healthcare providers for influenza-like illness to measure the ILI activity level within a state. It does not, however, measure the extent of geographic spread of flu within a state. Therefore, outbreaks occurring in a single city could cause the state to display high activity levels.

*Data collected in ILINet may disproportionately represent certain populations within a state, and therefore may not accurately depict the full picture of influenza activity for the whole state.

*Data displayed in this map are based on data collected in ILINet, whereas the State and Territorial flu activity map are based on reports from state and territorial epidemiologists. The data presented in this map is preliminary and may change as more data is received.

*Differences in the data presented by CDC and state health departments likely represent differing levels of data completeness with data presented by the state likely being the more complete.

*For the data download you can use Activity Level for the number and Activity Level Label for the text description.

*This graphic notice means that you are leaving an HHS Web site.

For more information, please see CDC's Exit Notification and Disclaimer policy.

For more information on the methodology, please visit Outpatient Illness Surveillance methods section.

Delaware Flu Cases

- Year to Date: 25
- New Castle: 21
- Kent: 0
- Sussex: 0
- Hospitalizations: 8
- Deaths: 0

Delaware RSV Cases

- Year to Date: 162
- New Castle: 146
- Kent: 11
- Sussex: 0

Coronavirus Updates

Worldwide

Total - 627,631,619
Deaths - 6,578,440

United States

Total - 97,198,630
Deaths - 1,067,686

Delaware (<https://myhealthycommunity.dhss.delaware.gov/locations/state>)

Total - 312,019
Deaths - 3,136

- New Castle - 177,299
- Kent - 60,780
- Sussex - 72,849

- Hospitalizations - 107
- Critical - 11
- Tests Positive: 8.4%
- Vaccines
 - Fully Vaccinated - 634,862 (65.6%)
 - Partially Vaccinated - 92,873
 - Boosted - 441,059 / Bivalent - 37,835

Updates

-

Monkeypox Updates

- 2022 [US Map & Case Count](#) - 27,884 total confirmed monkeypox/orthopoxvirus cases (41 in Delaware)
- Monkeypox [death](#) reported in Maryland
