

PROTECT YOUR COMMUNITY BY SPREADING IMMUNITY

Become a Vaccine Community Ambassador!

Interested participants will serve as community ambassadors to strengthen vaccination rates and improve vaccine confidence for uninsured adults. This exciting volunteer program is supported by the Delaware Division of Public Health.

As a Vaccine Community Ambassador, you will learn:

- Accurate information about vaccines
- Vaccine components and safety
- Vaccine facts vs. myths
- How to engage vaccine-hesitant community members

Volunteer benefits:

- Free virtual training session
- Hands-on community engagement experiences – perfect for certified nursing assistants (CNAs), retirees, and students
- Contribute to improved health in your community
- Small incentive payments for those who meet program requirements
- Lunch will be provided

Qualifications:

- The desire to help people and improve Delaware's community knowledge of vaccines
- 18 years or older
- College students strongly encouraged to apply
- Medical background not required

Are you an
active member
of your
community with
a passion for
health?

Choose the training session that works best for you!
